Joshua Arellano

contact@josh-a.dev — josh-a.dev — github.com/Joshua-Arellano — Missouri, USA

SUMMARY

Aspiring developer focused on type-safe languages, terminal tooling and open-source software. Currently building a TypeScript API issue tracker and finishing an Application & Web Development degree at Ranken Technical College.

EDUCATION

Ranken Technical College 2025 – 2027
Application & Web Development (AWD)
- Coursework in HTML & CSS, JavaScript, C# and React/Node.js.
- Capstone work: full-stack web apps and database-driven desktop tools.

EXPERIENCE

Creator & Maintainer — API Issue Tracker 2026 – present
- Designed a MERN-stack API for tracking issues inside a codebase.
- Implemented CRUD plus status, priority, reproduction steps, assignees, creation dates and time logging.
- Own the endpoint routes, controllers and data structure, and maintain the tracker day to day.

Kitchen Staff — Lead Baker, Kaldi's Coffee 2024 – present
- Prepared bakery according to recipes, quality and presentation standards.
- Maintained cleanliness and sanitation of work areas and equipment to ensure compliance with food safety regulations.
- Collaborated with team members to ensure smooth operation during peak hours.
- Managed inventory levels by FIFO, and handled low stock and waste.

PROJECTS

API Issue Tracker TypeScript — Express — MongoDB
MERN-stack API for tracking issues in a codebase: CRUD, status, priority, reproduction steps, assignees and time logging.

Weather App React.js — OpenWeatherMap
Responsive app that fetches real-time weather for any city.

Video Game Storage HTML5 — CSS3 — Vanilla JS
Catalog and manage a video game collection in the browser.

Emulator Frontend C# — MySQL
CRUD desktop app to manage NES collections and launch games.

SKILLS

Technical: HTML/CSS, JS/TS, Node.js, React/Vite, C#, .NET / ASP.NET, Express, Lua, MongoDB, MySQL, Git, object-oriented design.

LANGUAGES & INTERESTS

Languages: English (native).

Interests: soldering, homelab, drawing, CLI & TUI tools, open source.
